TO WHOM IT MAY CONCERN

REGARDING: VCM CONSTRUCTIONS PTY LTD

I have worked with VCM Constructions over the past 9 years in a consulting capacity on a variety of educational and commercial building projects.

I have found the company to be competent in all respects. VCM's dealings with clients are marked by integrity and honesty. I appreciate a builder who will not cut corners just to win a project. VCM is such a building company.

Their standards of workmanship are good, and their building sites always appear well appointed and organised.

The success of any company in the building industry is attested by repeat clientele. It is my observation that VCM has developed good working relationships with its client and consequently continues to win work from those clients.

I affirm VCM Constructions as a reputable, and competent building company.

Yours Sincerely,

Peter Anderson Architect
